

# Specialty Project

## A Perfect Pair of Pool Houses

Using initial drawings by the homeowner and working closely with the client's architect, SWS Builders built two pool houses to complement the historical main house. One house contains a bathroom and laundry, as well as ample storage for maintenance equipment and seasonal furniture. The other is dedicated to entertaining on the main level—there's a fully equipped kitchen and one-of-a-kind center island—and housing all the pool mechanicals in the full basement below.

*“This was our third project with SWS Builders. They have been phenomenal to work with over 15 years. It’s really important to be able to work with someone on a daily basis. We are very hands-on and have a wonderful relationship with their team. SWS stands behind their work; they are with you for life.”*

Weston Homeowner

## SWS Builders’ Inside View

*“The owner is a very talented and artistic person, who knew exactly what she wanted. Transforming her sketches and thoughts into two buildings with precision detail and character was crucial. We made mock-ups so she could see everything in 3-dimensions. We believe this extra step is very important so that clients can see and touch as much as possible before the actual work begins.”*
